

# Lab 1.1 setup

---

This is less a lab, and more a list of the recommended software for this course

## For windows users I recommend:

1. Download cmdr from

<https://cmdr.net/>

- a. Get the full version
- b. Unzip the folder
- c. Open cmdr.exe and pin it to your task bar

2. Download notepad++ from

<http://notepad-plus-plus.org/>

## For all OS (Windows, mac and Linux)

3. Download anaconda (python) from

<https://www.anaconda.com/products/individual>

- a. **MAKE SURE** you check the two check boxes
  - i. Add to PATH variable
  - ii. Make this version your default Python

4. Download vs code from

<https://code.visualstudio.com/Download>

- a. User installer

5. Download git from

<https://git-scm.com/downloads>

- a. I would recommend this even if you already have git on your machine, you should have the latest one

6. Create a GitHub account (for free) at

<https://github.com>
